Updates and Improvements 22.11.2020 14:34[New Feature] [Improvement] [Bugfix] - New OKEX API import - New CSV import for Zerion - Support for the new HitBTC CSV format - Improved ETH DEX imports - Abra CSV import now also imports - Abra CSV import for the rest - Updates on the FTX PnL converter - ETH Wallets added to Live Balance View - Bitpanda Pro CSV update for withdrawals fees - Rewards/Bonuses can now be imported at all supported exchanges -Update of the Bitstamp API with support for all new coins and better import of fees - Improved HMRC Excel exports - Fixed the percentage values in the 'Daily Balance' if the previous value is 0 - All wallet addresses and Xpubs now link to the Block Explorer view - Negative signs are now automatically removed for all numbers on the Enter Coins page - Fix for table sorting by date for all users who have chosen a custom and non-standard date format - Not valid transactions are now automatically skipped and highlighted as a warning in the CoinTracking CSV import - In addition to a 'Label', all wallet imports can now also have a 'Exchange/Wallet name' assigned. New Reporting: Current Balance 01.03.2017 18:59[New Feature] The current balance for all currencies you own. conversion to ounces) - Support for Independent Reserve API import fees - PDF export error on the Trade Analysis page fixed - Correct coin mapping for: VGX, BQX, ETHOS, TRIAS, WIN and WINK - 270 new coin icons added Updates and Improvements 20.12.2019 15:06[New Feature] [Improvement] [Bugfix] - Ledger Live CSV import added - STEX API and CSV import added - Tezos (XTZ) support for Coinbase CSV imports - The Custom Exchange Import can now overwrite wrong date formats - When printing and saving tax reports as PDF files, personal data (such as name, address) tax number, notes) can now be added if needed Updates and Improvements 10.11.2019 16:46[New Feature] [Improvement] - Bybit CSV and API - Binance API can now also import sold and silver transactions via CSV and API - Binance API can now also import for Binance JEX - Binance CSV: Support for Binance Jersey, Binance US, Binance JEX and Binance.com - Update for Binance BNB fees in CSV imports - Optimization for BitStamp fees in API import for Margin Trades (the API import is now slower, but can import all Margin Trades and not only those of the last 12 months) Kraken API update 22.10.2019 12:27[Improvement] As of now, the Kraken API can import ALL transactions and not just the last 300 tx. You can find it under: Enter Coins -> BTC Public Address Scan Updated CSV Import for Poloniex 13.02.2016 17:49[Improvement] We have written a new Poloniex Importer, which can now track additional information. We have all current and historical prices. Themes for CoinTracking 17.02.2017 17:11[New Feature] CoinTracking 17.02.2019 12:27[Improvement] - New wallet imports for BCH and BSV - New coins added to the "Altcoin Wallet Import" - A click on the addresses within a wallet import page now leads directly to a Block Explorer - New tab navigation to quickly switch between different wallet imports 16.10.2019 16:31 [Improvement] [Bugfix] - Optimization of all CSV exports and adjustment of numbers - In addition, different formats are now available for CSV exports which are supported by all common programs like Excel, Numbers, Google Docs and OpenOffice - Transactions can now also be deleted by the date of the import/entry with the function "Bulk Edit/Delete" - The form 8949 PDF/print export has been adapted to all common ISO/DIN letter formats (US Letter, A4, B4). It includes prices of all existing Altcoins on the market and adds new Altcoins automatically. We think it is better for our users, to have all information on one page instead of searching them on different sites. Bitfinex API Update 05.02.2018 23:37[Improvement] [Bugfix] - The Bitfinex API can now also import settlements - Cancelled withdrawals are no longer imported - Trade pairs where Bitfinex uses the wrong ticker are now imported correctly Bitfinex API Import Bugfix 12.01.2018 17:23 [Bugfix] Fixed a problem where the new Bitfinex API importer sometimes imported the wrong fee and therefore wrong amounts. New Coinbase import 22.12.2016 16:03 [Improvement] We have completely rebuilt the Coinbase import. Everything before July 01 can be found in our main thread at the Bitcointalk Forum. This can be useful to calculate the FIAT value of all fees at the end of the year. This can be useful for ICO coins, which are not yet on the market. In addition, optimizations and improvements to the profit calculation were made. Thanks to the new Importer, also executed orders and margin trades can be imported. Several improvements and bugfixes 22.12.2018 20:57[Improvement] [Bugfix] API Imports: - Huobi API bugfix for fee calculation, date deposits and withdrawals - Exodus CSV Bugfix for fee calculation - Bugfix for Legacy imports (Mt.Gox and others) - Bitcoin.de referral payments are now imported as income - Coinbase CSV - added support for all listed Coinbase coins (ZEC, BAT...) - The CoinTracking CSV import can now optionally import TX-IDs as well as the buy and sell value. Poloniex CSV Import Update 03.12.2017 23:32[Improvement] The Poloniex CSV import now supports not only trades and lending but also deposits and volume, values and volume, grouped by month or by year. For example, the Dashboard and the Reporting page will be reloaded because the cached data is required there. It includes a capital assets and can be exported to many formats such as PDF, CSV, Excel, Form 8949, TaxACT and TurboTax. If your CoinTracking Kraken balance does not exactly match the values on Kraken, please delete all your Kraken trades and import them again. CoinTracking App & Widget for Android from Google Play. You can find it here: Reporting -> Number of Trades Several improvements 11.11.2018 14:34[Improvement] - Improved display of the navigation tabs "Reporting" and "Enter Coins" - In the Tax Report all Excel and PDF exports now contain the sum of all values in the footer (the "print page" export will get the same footer extension in a few days). New CSV Import for OKCoin (04.11.2015 21:30[New Feature] Trades of OKCoin (okcoin.com) can now be automatically uploaded via the CSV Importer. And a list with current prices and trade volumes to all Altcoins on the market, can be found under "Charts & Research" -> "All Digital Currencies". And charts for fees,
grouped by currency and exchange or trade group. The advanced search is available on the following pages (above the default serach box): - Enter Coins - Reporting -> Trade List - Reporting -> Trade Prices New Fiat Currency: Romanian Leu (RON) 11.04.2016 10:08[Improvement] On request of Romanian users, we added RON as currency. Binance CSV Import Update 02.12.2017 22:42[Improvement] The Binance CSV import now supports not only trades but also deposits and withdrawals. New Reporting: Realized and Unrealized Gains 19.10.2016 14:08[New Feature] Calculation of unrealized and realized gains for all your currencies including a coin-grouped summary. The Rock Trading API. You can choose between the best price, the transaction price and the counterpart price. This avoids warnings when a fraction of an asset is still open - HitBTC API now correctly assigned correctly assigns IOTA as IOT - Endor-Protocol (EDR) and E-Dinar (EDR2) are now assigned correctly updates and Improvements 04.01.2019 19:42[Improvement] [Bugfix] - New Idex CSV Import - Update of the Exodus CSV Import (Trades are now supported and imported) - The "Current Balance" is now displayed in the mobile version of the dashboard above the "Timeline" - Fixed a problem where the Add/Edit Pop-Up boxes in the "dark theme" on the "Enter Coins" and "Easy Enter" pages were displayed incorrectly Updates and Improvements 27.12.2018 02:40[Improvement] [Bugfix] - Bitfinex API problem solved where some users got a "Nonce too small" error message - Tax report: losses in the base currency are now displayed in the stolen and lost report - The coins BLZ and BLZ2 are now assigned correctly 3 New Methods for Tax Calculation 22.12.2018 20:57[New Feature] By popular request, three new methods for tax calculation are now available to all CoinTracking users: - AVCO - Average Cost Similar to FIFO, but with the average cost basis for every purchase. Issues with the HTML and PDF Export fixed 14.12.2015 23:59[Bugfix] Some newer coins were not displayed during export. New Imports 19.08.2017 19:55[New Feature] [Improvement] - Gatecoin API Import - Cryptopia API Import incl. Assignment of Coins: - Numerous coins (e.g. ALT, PAC, ARB, SEATHER...) are now correctly assigned - Correct assignment of individual exchange tickers (Binance YOYO -> YOYOW, Huobi PROPY -> PRO, and others) Interface: - Problems with the pop-up boxes in the dark theme (bulk edit/delete, edit tax reports, etc.) have been fixed - Fixed sorting by date for the Instant Gains Calculator - Fixed a problem on the "Trading Fees" page when a quotation mark is included in the comment Update for exports 16.11.2018 00:58[Improvement] When exporting the tax report and the report for (un)realized gains, the totals in the footer are now also exported (for Excel, PDF and print table). GDAX CSV Import Update 04.12.2017 00:40[Improvement] The GDAX CSV import now supports not only trades but also deposits and withdrawals. Under "Reporting -> Easy Enter Statistics" you can now add or edit entries. New import for Gemini.com 14.02.2017 15:26[New Feature] We just released an import function for Gemini.com. Updates and Improvements 20.11.2021 12:44[New Feature] [Improvement] [Bugfix] API - Celsius (Live balance update) - Binance (several improvements, e.g. improved duplicate check, support of referral kickback transactions) - Poloniex (several improvements, e.g. for fee, trade and income transactions) - FTX (lending and staking is now imported) - Coinspot (fees are now correctly imported) - Kraken (separation of spot and earn wallet) CSV -
